Executive Summary

Engineering executive and distinguished architect with 20+ years of experience leading large-scale platform engineering, DevSecOps, cloud transformation, and enterprise security initiatives. Currently leading Platform Engineering (DevOps, FinOps), Cloud Infrastructure, IT Operations and Information Security as CISO. Known for combining deep hands-on architecture expertise with executive leadership to build secure developer platforms, scale cloud infrastructure, and drive enterprise-wide transformation.

Key Impact

Led global engineering organizations of 50+ engineers

Platforms built and operated used by 8000+ developers

Managed \$15M+ annual cloud infrastructure spend

Delivered ~\$2M savings through FinOps and cloud optimization

Ability to alternate between executive leadership and deep technical hands-on architecture

Selected Architecture Achievements

Enterprise Internal Developer Platform used by 8000+ engineers in a global bank reducing Time-To-First-Hello-World from weeks to days

Self-Serve DevOps platform with guardrails and approvals enabling faster lead time and cost reduction

Declarative ephemeral performance testing environments –

Technology Stack

Cloud: AWS, Azure

Containers: Kubernetes, Docker

IaC: Terraform, Chef

DevOps: GitHub Actions, CI/CD Platforms

Observability: Prometheus, Grafana

Security: DevSecOps, Zero Trust, Threat Modeling

Languages: Python, Bash

AI: LLM Platforms, Azure OpenAI

FinOps & Cloud Cost Optimization

Developer Experience Platforms

Enterprise Security Leadership (CISO)

Professional Experience

Global VP – Platform Engineering & CISO | RamSoft Inc | 2024 – Present

Lead platform engineering, cloud infrastructure, IT operations and information security strategy.

Manage enterprise platforms supporting thousands of developers.

Delivered ~\$2M savings through FinOps initiatives and cloud optimization.

Established DevSecOps guardrails and internal penetration testing capabilities.

Drive enterprise adoption of AI tools improving developer productivity.

Senior Architect | Play Games24x7 | 2022 – 2024

Built self-service platform engineering ecosystem enabling developer autonomy.

Designed Kubernetes-native testing, automation and security architecture.

Implemented ephemeral testing environments and secure CI/CD pipelines.

Vice President – GitHub Platform Engineering | Standard Chartered Bank | 2020 – 2022

Built enterprise developer experience (DevEx) platform enabling secure and compliant delivery.

Accelerated software delivery across global engineering teams.

Expert Architect | HP Inc | 2019 – 2020

Built centralized DevOps platform eliminating tooling sprawl.

Integrated threat modelling-as-code and diagramming-as-code into CI/CD pipelines.

IT Technology Senior Consultant | SAP Labs | 2018 – 2019

Led DevOps automation and cloud modernization initiatives.

Engineering Leadership Roles | Altisource, Yodlee, EdgeVerve | 2004 – 2018

Built orchestration and automation platforms for multi-cloud deployments.

Implemented infrastructure as code using Terraform and Chef.

Led engineering teams delivering enterprise banking solutions.

Certifications

Certified Kubernetes Administrator (CKA)

Certified Kubernetes Security Specialist (CKS)

Certified DevSecOps Professional (CDP)

Azure AI Engineer Associate (AI-102)

NVIDIA Generative AI & LLM Associate

Securiti Certification AI Security & Governance

Education

BE (Electrical Engineering) – Madurai Kamaraj University

MBA (Systems) – Sikkim Manipal University

Achievements & Publications

Author – Platform Engineering & Security (BPB Publications)

Best Security Implementation Award – Datacenter Summit 2023

Multiple organizational excellence awards
